

Cornish Cross

Our fast-growing Cornish Cross chicks are a top seller.

With high meat yields and an excellent feed conversion rate, this bird is highly efficient for commercial or large scale production.

Our strain of Cornish Cross is hardy and strong with excellent livability. They reach market weight in just 6 to 8 weeks, yielding quick results and good profit margins.

An ideal meat bird for any market

For added versatility, Cornish Cross chickens can be processed at different ages to achieve a variety of market needs.

As-Hatched Performance

Week	Weight (lb)	Daily Gain (lb)	Av. Daily Gain (lb)	Daily Intake (lb)	Cum. Intake (lb)	FCR
1	0.445	0.068	0.050	0.072	0.338	0.759
2	1.113	0.116	0.073	0.136	1.088	0.978
